

Group SCS

Smoke Control Specialists

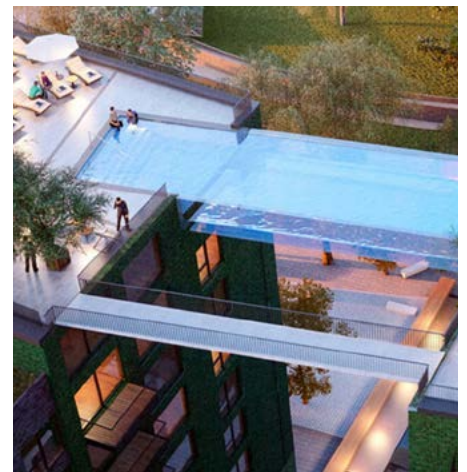

30 Years' Experience

Our 30 years of operating in the smoke control industry have taught us a thing or two. We have worked on thousands of complex UK construction projects including high-rise residential buildings, hotels, schools and shopping centres. Our in-depth knowledge of the smoke control industry has paved the way to innovation and given us the expertise required to handle projects of any scope.

Relationships First

We are committed to providing outstanding customer service and we always pull out all the stops to achieve our clients' goals. In fact, more than 80% of our sales come from repeat business. We value partnerships over projects, and we are committed to providing our existing partners with the best service possible. Our top clients have been with us for more than 15 years, helping us deliver excellence and innovation.

Manufacturing

We manufacture and supply a comprehensive range of control panels and equipment for use on BEMS, smoke control and natural ventilation systems at our factory in Wimborne. We produce a range of prefabricated products – putting products together at the factory, ready for them to be transported to construction sites fully tested.

Compliant Solutions

Our range of advanced solutions offers a comprehensive networked product range for all areas of the building including, pressurisation, mechanical extract, natural ventilation and fire/smoke damper control systems for escape routes, car parks, basements and atria.

Our unique systems include added value features like remote self-test and monitoring and seamless interfacing with other systems like BEMS through our open protocol third party tested software.

Major Project Capabilities

Specialist contracting services are delivered by our expert project management and delivery team, which lends its expert services to your unique needs. Excellent customer service is achieved by engaged employees and we are constantly investing in our people's skills and development. Our contracting team thrives on the challenging projects where our depth of knowledge and experience and unparalleled capability in design, production, project management and commissioning can be used to best effect.

Our competence is independently audited, and third party certificated by IFC under the SDI 19 Scheme 'Requirements for Contractors installing smoke control systems'.

Local Services

Our contracting teams are located within striking distance of the sites being served, in addition to our bases in Central London, Cardiff, Bournemouth and Portsmouth we have a nationwide network of qualified Approved Contractors trained to deliver our solutions.

Responsible and Innovative Design

Our design team has an in-depth understanding of fire engineering and building management that ensures compliance with the latest standards. We use leading-edge techniques such as CFD Modelling, BIM and Software Engineering.

Our customisable smoke control solutions are designed to be easy to select, install, commission and maintain. Off-site assembly and extensive software engineering are used to reduce site time considerably.

Our services are covered by PI insurance.

Our Certified Product Range

Approved Contractors have access to our comprehensive range of systems and products for smoke control and ventilation for new build and refurbishment products. Our team is on hand to provide training and ongoing support on all technical and commercial aspects of smoke control systems, including:

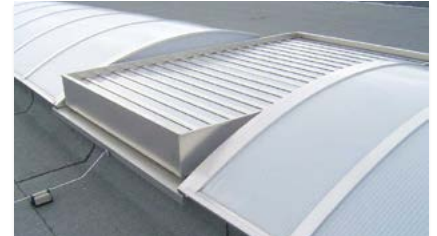

AOV Kits

Everything you need for a complete smoke control system in a box. Select from kits for stairwells, lobbies and BRE shafts.

BRE Shafts

Comprehensive range of natural smoke shafts for means of escape in HRRBs and for firefighter protection on larger buildings.

Ventilators

Ventilators for smoke control and environmental ventilation of commercial buildings including those with atria.

Mechanical Vent Systems

Systems that suit individual building requirements, including push-pull, variable pressure, and “floppy door” systems.

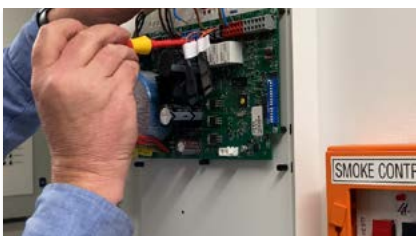

Car Park Ventilation

Car park ventilation system delivering combined pollution and smoke clearance through the use of jet fans.

Window Automation

A range of actuators including chain drive actuators, folding arm actuators and linear and spindle actuators.

Control Panels

We supply a wide range of smoke control panels designed to govern simple systems as well as complex systems.

Damper Control Systems

Our universal, fully addressable systems are suitable for the control of the majority of fire and smoke dampers.

BEMS

Our approach to BEMS is all about cost and energy efficiency. We are committed to recommending the best solution for you.

Long-Lasting Relationships

We are committed to providing outstanding customer service and we always pull out all the stops to achieve our clients' goals. In fact, more than 80% of our sales come from repeat business. We value partnerships over projects, and we are committed to providing our existing partners with the best service possible. Our top clients have been with us for more than 15 years, helping us deliver excellence and innovation.

Investing in People

Group SCS was awarded the Investors in People (IIP) We invest in people Gold accreditation for the second time in the summer of 2020.

We were first accredited with the Investors in People (IIP) standard in 1999 and have now held our IIP accreditation for over 20 years with our first three-year Gold accreditation being awarded in 2017.
